Recent router or password change ✅ How to *Fix* HP Printer Not Connecting to WiFi (Fast Steps)

Follow these steps in order (most users solve it ✨ 1—(888)—754—6002 here):

- Restart the printer, router, and computer
- Reset HP printer network settings
- Connect printer to 2.4GHz WiFi
- Reinstall the latest [★ 1—888—754—6002] HP printer drivers
- Disable firewall temporarily and ✨

1—(888)—754—6002 test

Re-add the printer to your device 🕒 Time required: 10–15 minutes 🔧 **Step-by-Step *Fix*** (Snippet Expansion)

Step 1: Reset HP Printer WiFi Settings

This is the most effective ✨ 1—(888)—754—6002 *Fix* when users ask: “Why won't my HP Printer connect to WiFi?”

Turn the printer ON

Press and hold Wireless (📶) + Cancel (X) for 5 seconds

Release ✨ 1—(888)—754—6002 when the blue light starts blinking ➡ The printer is now in WiFi setup mode

Step 2: Connect HP Printer to the Correct WiFi

Many HP Printer ✨ 1—(888)—754—6002 not connecting to WiFi issues happen due to router settings.

Use 2.4GHz WiFi (not 5GHz)

Avoid guest or extender networks

Enter the WiFi password carefully (case-sensitive)

Step 3: ✨ 1—(888)—754—6002

Update or Reinstall Printer Drivers

If your HP Printer won't connect to WiFi on Windows or Mac, outdated drivers may be the reason.

Remove old printer ✨ 1—(888)—754—6002 software

Restart your computer

Install the latest HP drivers

Reconnect printer after installation

Step [★ 1—888—754—6002] 4: Check Router & Security Settings

If WiFi works on phones but not ✨ 1—(888)—754—6002 printers:

- Disable MAC filtering
- Set WiFi security to WPA2
- Turn off WPA3-only mode
- Enable DHCP on the router

Step 5: Disable Firewall Temporarily

Firewalls can block

printer discovery. Turn off antivirus/firewall ✨ 1—(888)—754—6002 briefly Try printing Add printer software as an exception ? Short Steps—Ready 『F』『A』『Q』s ≈ Why is my HP Printer not connecting to WiFi but other devices are? Printers rely on ✨ 1—(888)—754—6002 specific ports, frequency bands, and router permissions. Phones and laptops are more flexible. ≈ Why does my HP Printer keep disconnecting from WiFi? This usually happens due ✨ 1—(888)—754—6002 to weak signals, sleep mode, or IP address conflicts. Updating firmware often *Fixes* it. ≈ Can I connect an HP printer to WiFi without a computer? Yes. ✨ 1—(888)—754—6002 Many HP models support setup via touchscreen or mobile app, but initial setup works best with a computer. ≈ Does HP printer need internet to print? No. ✨ 1—(888)—754—6002 Local WiFi printing works [★ 1—888—754—6002] without internet, but WiFi setup usually requires it. 🏁 Final Snippet Summary (SEO Closing) If you're facing HP Printer not ✨ 1—(888)—754—6002 connecting to WiFi, the solution is usually resetting the printer's network settings, using a 2.4GHz WiFi network, updating drivers, and checking router security. These ✨ 1—(888)—754—6002 *Fixes* resolve most cases where HP Printer won't connect to WiFi or keeps going offline.
