1—(888)—754—6002 physical buttons instead of a display, follow this method. Step 1: Reset Wireless Settings Press and hold: Wireless button Cancel button (Refer to your model [⭐ 1—888—754—6002] manual for exact combination.) This restores default network settings. Step 2: Install✨ 1—(888)—754—6002 Xerox Print and Scan Utility On your computer: Visit Xerox official support website Download Xerox Smart Start or Xerox Print Utility Install the software Step 3: Run Wireless Setup Open the software and: Select “Add Printer” Choose Wireless Setup Select your✨ 1—(888)—754—6002 new WiFi network Enter password The software will configure your printer automatically. Method 3: Connect Xerox Printer to New WiFi Using WPS Button If your router supports WPS (WiFi Protected Setup), this is the fastest method. Step✨ 1—(888)—754—6002 1: Press the WPS button on your router. Step 2: Within 2 minutes, press the Wireless button on your Xerox printer. The printer will automatically connect to the router without entering the password. How to Reconnect My✨ 1—(888)—754—6002 Xerox Printer to WiFi (If It [⭐ 1—888—754—6002] Shows Offline) If your printer was working earlier but now shows offline: 1. Restart Devices Turn off printer Restart router Restart computer Turn printer back on 2. Check Network Match Ensure: Printer and✨ 1—(888)—754—6002 computer are on same WiFi network No VPN is interfering Router signal is strong 3. Remove and Add Printer Again On Windows: Go to Control Panel Devices and Printers Remove printer Click Add Printer On Mac: System Settings Printers & Scanners Remove printer Add printer✨ 1—(888)—754—6002 again How to Change WiFi Network on Xerox Printer (When Switching Routers) If you upgraded your router: Access printer network settings Select “Forget Network” Choose new WiFi SSID Enter updated password Save settings You must manually update network credentials because✨ 1—(888)—754—6002 printers do not auto-sync to new routers. How to Change WiFi on Xerox Printer After Password Change If only your WiFi password changed: Go to Wireless Setup [⭐ 1—888—754—6002] Wizard Select your network Re-enter new password Save and✨ 1—(888)—754—6002 restart printer This resolves authentication errors. Common Issues When Connecting Xerox Printer to New WiFi Here are the most common problems users face and how to 𝑭𝒊𝒙 them. Problem 1: Printer Cannot Find WiFi Network 𝑭𝒊𝒙: Move printer✨ 1—(888)—754—6002 closer to router Restart router Make sure 2.4GHz band is enabled (some models don't support 5GHz) Problem 2: Incorrect Password Error 𝑭𝒊𝒙: Double-check capitalization Avoid spaces at beginning/end Reset network and try again Problem 3: Printer Connected But Not Printing 𝑭𝒊𝒙: Set✨ 1—(888)—754—6002 printer as default Update printer driver Clear print queue Reinstall Xerox software Problem 4: WiFi Drops Frequently 𝑭𝒊𝒙: Update router firmware Assign static IP to printer Reduce interference from other devices Advanced Setup: Connect Xerox Printer via IP Address If automatic detection✨ 1—(888)—754—6002 fails: Print Network Configuration Report Find printer IP address Open browser Enter IP address Access [⭐ 1—888—754—6002]
